

FIRM OVERVIEW

Gahagan & Bryant Associates, Inc. (GBA) is a unique engineering firm that specializes in providing consulting and engineering services for variety of projects, including port development, dredged material management, hydrographic surveying, coastal engineering and construction management. The firm was founded in 1975 by William Gahagan and J. Franklin Bryant, two engineers each of whom had compiled 25 years of hands-on field experience with major dredging firms operating throughout the United States, South America and the Middle-East. Our associates and staff have gained their skill and experience through years of service with major dredging, marine engineering, water resource development and construction firms as well as through direct participation in the scientific community.

SPECIALIZED EXPERIENCE

GBA has over 35 years of hands-on experience in all types of dredging and dredging related projects. With over 80 engineers and support personnel located in offices in Camas, WA; Los Angeles and Novato, CA; Baltimore, MD; Wilmington, NC; Wilmington, DE; Philadelphia, PA; Tampa, FL; Houston, TX; GBA is strategically located to provide diverse theoretical and practical knowledge along with technical expertise to meet each client's needs.

The following list details selected GBA capabilities that may be applicable to port projects:

- Hydrographic Surveying
- Cost Estimates and Analysis
- Dredging Engineering
- Design and Management of Dredged Material Placement Areas
- Report Preparation and Presentation
- Preparation of Plans, Specifications and Construction Documents
- Construction Inspection and Management
- Final Report & Recommendation for Acceptance
