

Jacobs Engineering Group is one of the world's largest and most diverse providers of professional technical services. With annual revenues approaching \$5 billion, we offer full-spectrum support to industrial, commercial, and government clients across multiple markets. Services include scientific and specialty consulting as well as all aspects of engineering and construction, and operations & maintenance.

Our fundamental business strategy is building long-term client relationships. With more than 55 years in the industry, we have attracted and retained clients by providing superior customer value—over 90 percent of our work is repeat business from loyal clients.

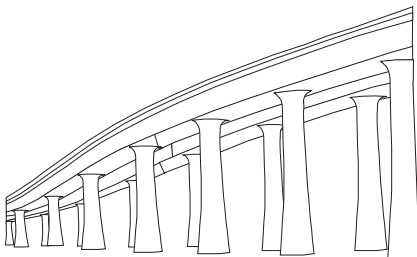

Jacobs maintains a close working relationship with many diverse business interests. We use our excellent market position to foster outreach and mentor relationships with small and disadvantaged businesses.

We provide terminal planning, project scoping, environmental review, structural analysis, schematic design and cost estimates, final design, construction services and inspection. We are also experienced in various delivery methods including Design – Build and General Contracting/Construction Management (GC/CM). One of our strengths is our ability to deliver both small and large projects effectively. We are known for our ability to achieve interagency consensus early so as not to impact the project schedule. With our extensive experience and diverse staff, we know how to integrate small projects into your Port's overall program to ensure they meet operational needs and funding requirements.
